

## PI 3-kinase p101 rabbit pAb

## Cat No.:ES5354

For research use only

## Overview

Product Name	PI 3-kinase n101 rabbit n∆h
Host species	Rabbit
Applications	
Species Cross-Reactivity	Human: Mouse
Becommended dilutions	Western Blot: $1/500 - 1/2000$
Immunogen	Immunohistochemistry: 1/100 - 1/300 FUSA:
	1/20000 Not yet tested in other applications
	The antiserum was produced against synthesized
	nentide derived from human DIK2R5 AA
	rango:605-744
Spacificity	PI 2 kinaso p101 Polyclopal Antibody dotocts
Specificity	and granous lovals of PL2 kinasa n101 protoin
Formulation	Liquid in DPS containing 50% glycorol 0.5% PSA and
Formulation	0.02% sodium azida
Storago	Store at 20°C Avoid repeated fragge thaw evelop
Drotoin Nama	Store at -20 C. Avoid repeated freeze-tillaw cycles.
Gono Namo	
Gene Name	PIKSKS
Central localization	mucleus . Cytopiasm . Cell memorane ; Peripheral
	nucleus in absonce of RIK2CC (n120, Colocalized in the
	Nucleus III absence of PIRSCG/p120. Colocalizes with
	PIRSCG/p120 in the cytoplasm. Translocated to the
	pidsina membrane in a beta-gamma G
Durification	The antihody was affinity purified from rabbit
Furnication	antisorum by affinity, chromatography using
	antiserum by animity-cirroniatography using
Clonality	Polyclopal
Concentration	
Observed band	
	100KD 22522
Human Swice Drot Number	
	UNINI DIKAPE: Dhoshhoinositido 2 kinasa ragulataru
Alternative Names	cubunit Ex DI2 kinase regulatory subunit Ex
	Suburne 5, PIS-Kindse regulatory Suburne 5;

Background

PI3-kinase p101 subunit; Phosphatidylinositol 4; 5-bisphosphate 3-kinase regulatory subunit; PtdIns-3-kinase regulatory subunit; Protein FOAP-2; PtdIns-

Phosphatidylinositol 3-kinases (PI3Ks) phosphorylate the inositol ring of phosphatidylinositol at the 3-prime position, and play important roles in cell growth, proliferation, differentiation, motility, survival and intracellular trafficking. The PI3Ks are divided into three classes: I, II and III, and only the class I PI3Ks are involved in oncogenesis. This gene encodes the 101 kD regulatory subunit of the class I PI3K gamma complex, which is a dimeric enzyme, consisting of a 110 kD catalytic subunit gamma and a regulatory subunit of either 55, 87 or 101 kD. This protein recruits the catalytic subunit from the cytosol to the plasma membrane through high-affinity interaction with G-beta-gamma proteins. Multiple alternatively spliced transcript variants encoding two distinct isoforms have been found. [provided by RefSeq, Oct 2011],

Immunohistochemistry analysis of paraffin-embedded human colon carcinoma tissue, using PIK3R5 Antibody. The picture on the right is blocked with the synthesized peptide.
