

TRIP15 rabbit pAb

Cat No.: ES8019

For research use only

Overview

Product Name TRIP15 rabbit pAb

Host species Rabbit

Applications WB;IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat; Monkey **Recommended dilutions** Western Blot: 1/500 - 1/2000.

Immunofluorescence: 1/200 - 1/1000 FI

Immunofluorescence: 1/200 - 1/1000. ELISA: 1/20000. Not yet tested in other applications. The antiserum was produced against synthesized

Immunogen The antiserum was produced against synthesized

peptide derived from human COPS2. AA

range:181-230

Specificity TRIP15 Polyclonal Antibody detects endogenous

levels of TRIP15 protein.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and

0.02% sodium azide.

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name COP9 signalosome complex subunit 2

Gene Name COPS2

Cellular localization Cytoplasm . Nucleus .

Purification The antibody was affinity-purified from rabbit

antiserum by affinity-chromatography using

epitope-specific immunogen.

Clonality Polyclonal
Concentration 1 mg/ml
Observed band 55kD
Human Gene ID 9318
Human Swiss-Prot Number P61201

Alternative Names COPS2; CSN2; TRIP15; COP9 signalosome complex

subunit 2; SGN2; Signalosome subunit 2; Alien homolog; JAB1-containing signalosome subunit 2;

Thyroid receptor-interacting protein 15; TR-interacting protein 15; TRIP-15

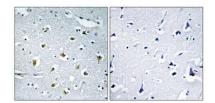

Background function: Essential component of the COP9

+86-27-59760950 ELKbio@ELKbiotech.com www.elkbiotech.com

signalosome complex (CSN), a complex involved in various cellular and developmental processes. The CSN complex is an essential regulator of the ubiquitin (Ubl) conjugation pathway by mediating the deneddylation of the cullin subunits of SCF-type E3 ligase complexes, leading to decrease the Ubl ligase activity of SCF-type complexes such as SCF, CSA or DDB2. The complex is also involved in phosphorylation of p53/TP53, c-jun/JUN, IkappaBalpha/NFKBIA, ITPK1 and IRF8/ICSBP, possibly via its association with CK2 and PKD kinases. CSN-dependent phosphorylation of TP53 and JUN promotes and protects degradation by the Ubl system, respectively. Involved in early stage of neuronal differentiation via its interaction with NIF3L1.,PTM:Phosphorylated by CK2 and PKD kinases., similarity: Belongs to the CSN2 family., similarity: Contains 1 PCI domain., subunit: Interacts with NIF3L1 (By similarity). Component of the CSN complex, composed of COPS1/GPS1, COPS2, COPS3, COPS4, COPS5, COP6, COPS7 (COPS7A or COPS7B) and COPS8. In the complex, it probably interacts directly with COPS1, COPS4, COPS5 COPS6 and COPS7 (COPS7A or COPS7B). Interacts with CUL1 and CUL2. Specifically interacts with the ligand binding domain of the thyroid receptor (TR). Does not require the presence of thyroid hormone for its interaction. Interacts with IRF8/ICSBP1 and with nuclear receptors NR2F1 and NR0B1.,

Immunohistochemical analysis of paraffin-embedded Human brain. Antibody was diluted at 1:100(4° overnight). High-pressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negetive contrl (right) obtaned from antibody was pre-absorbed by :

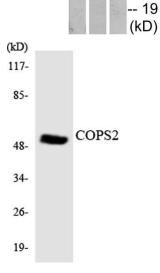

Immunofluorescence analysis of A549 cells, using COPS2
Antibody. The picture on the right is blocked with the synthesized peptide.

Western blot analysis of lysates from COS7 and COLO205 cells, using COPS2 Antibody. The lane on the right is blocked with the synthesized peptide.

Western blot analysis of the lysates from 293 cells using COPS2 antibody.
